

Hurricane Katrina Resources for Cancer Patients

The American Cancer Society has established and identified some wonderful resources to assist cancer patients that have been displaced or need assistance as a result of Hurricane Katrina. We are here to help and I encourage you to look at the resources that are updated daily on our website. Patients can also receive assistance through our 1-800 #.

Our national office has compiled numerous resources that are accessible through our website: www.cancer.org

We have also set up some special processes for our call center 1.800.ACS.2345 for storm victims.

If you encounter needs for cancer pts please feel free to utilize these resources. Additionally, Pam Bostick will be assisting in the navigation of patients- her information is below:
